Medical records must state the medical necessity for each item ordered

Hospital Beds

- The patient has a medical condition that requires frequent change in body position and/or an immediate need for change in body position not feasible with an ordinary bed, **OR**
- The patient requires positioning of the body in ways not feasible with an ordinary bed to alleviate pain, **OR**
- The patient requires the head of the bed to be elevated more than 30 degrees most of the time due to congestive heart failure, chronic pulmonary disease, or problems with aspiration.

Commodes

- A commode is covered when the patient is physically incapable of utilizing regular toilet facilities. This would occur in the following situations:
 - The patient is confined to a single room **OR** the patient is confined to one level of the home environment and there is no toilet on that level.

Support Surfaces

Group 1

- Patient is completely immobile **OR** Ulcer(s) on the trunk or pelvis **AND/OR**
- Patient is Partially immobile **and at least one of the following:**

Incontinence	Altered sensory perception
Compromised circulatory status	Impaired nutritional status

Group 2

- Multiple stage 2 pressure ulcers located on the trunk or pelvis and has been on a comprehensive ulcer treatment program for at least the past month with group 1 support surface and the ulcers have worsened or remained the same over the past month **OR**
- Large or multiple stage 3 or 4 pressure ulcer(s) on the trunk or pelvis.
